Profile

Hi, I'm Guilherme! I'm a professional working in software development, currently focusing on front end and mobile but learning more about NodeJS in the backend. I'm always willing to learn new technologies

and I really like new challenges. My work is always focused on the user to have the best experience and interface while using the system. I'm always studying new technologies and also always wanting to expand my knowledge.

I worked in large companies like the Ministry of Health in Brazil, a research and technological innovation institute (FUNDEP) and also worked on the development of hybrid applications that have more than 20k users. So I always carry out my work with care and quality.

Nowadays I've been working abroad in The Netherlands. Here I'm able to improve my English skills but also to improve my coding knowledge.

Employment History

Frontend Developer, Turff, Delft

January 2022 — Present

Main activities: Develop frontend interfaces for multiple project using VueJS version 2, VueJS version 3, ReactJS and Typescript. After a while I started helping the backend that we mainly used NodeJS, Express and Typescript.
